PROFESSIONAL SUMMARY

Full-stack developer and AI agent architect. Built Hermes Agent v0.12 (7-profile multi-agent system) managing 6 business ventures autonomously. Shipped 10+ React/Supabase applications including BugSmasher (237 tests, 95+ Lighthouse) and RollON e-commerce. Seeking xAI Exceptional Engineer to advance truth-seeking AI.

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Bash, SQL

AI Systems: LLM routing, Prompt Engineering, Multi-agent orchestration, Hermes Agent

Frontend: React, Vite, PixiJS, Tailwind CSS

Backend: Supabase (Auth, Realtime, RLS), Node.js, Express

PROFESSIONAL EXPERIENCE

Hope Theory / Hermes Agent - Founder & Lead AI Architect

2024-Present

- Built 7-profile multi-agent system reducing LLM token costs by 40% through caching and provider routing
- Integrated 15+ LLM providers (OpenRouter, Gemini, Groq, xAI, Kimi) with automatic failover
- Created reusable skills framework (50+ procedures) for production AI workflows
- Achieved sub-100ms response times for cached queries

Portfolio Projects - Full-Stack Developer

2022-Present

- BugSmasher: React + Supabase real-time app, 237 Jest tests, 95+ Lighthouse (bugsmasher-ten.vercel.app)
- RollON: E-commerce with Stripe checkout, variants, inventory (rollon-delta.vercel.app)
- Insectiles: PixiJS game with leaderboards (insectiles.vercel.app)

Freelance AI Developer - Code Ninja Venture

2023-Present

- Delivered 10+ enterprise SaaS/e-commerce solutions (\$4K-\$8K monthly revenue)
- Maintained 100% client satisfaction, sub-24hr turnaround
- Production-ready delivery with test coverage and CI/CD

EDUCATION

BSc Computer Science - University of Dubai

2018-2022 | Focus: AI, Distributed Systems
